

Trusted, Effective, Affordable

SPECIALIST PRE-LAMBING LICK

SUMMARY:

B4 Lamb is a specialist formulation designed to support lambing ewes through the last trimester of pregnancy and through until the end of Lambing. B4 Lamb is formulated to support high production ewes perform to their genetic potential and best navigate the challenges of metabolic diseases that cause potential loss of production and mortalities. Magforce is suggested post Lambing until Weaning.

CONTAINS:

Macro Mineral		Trace Elements	Vitamins
Calcium	10%	Manganese	A, D, & E
Phosphorus	1.8%	Zinc	
Magnesium	12.5%	Copper	Additional Ingredients
Sodium	7.6%	Cobalt	Soluble Sugars
Sulphur	1%	Iodine	Molasses
		Selenium	All weather formula

DOSE RATE:

Ewes: 20 grams/head/day.

TIMING:

Ideally supplemented in the 4-6 weeks prior to Lambing through until Lambing is complete.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

DIRECTIONS FOR USE:

B4 Lamb can be added to tubs or troughs and placed near water points or sheep camps. Once sheep are engaged with the lick, place containers further out in paddocks to better manage distribution of the lick across the mob. Feeding hay should be considered through the Lambing period. Ensure quality water is available at all times.

BEST BEFORE:

12 Months from date of Manufacture.
