LAMB FEEDLOT MINERAL LICK

SFMCA
Stock Feed Manufacturers' Council of Australia

INTENSIVE FEEDING LICK
FOR FEEDLOT LAMBS

SUMMARY:

Lamb Feedlot Mineral Lick is a high specification supplement, formulated to help feedlot Lambs achieve growth, health and feed efficiency targets and to effectively manage rumen pH levels. Lamb Feedlot Mineral Lick is a simple way for producers who are unable to mix supplements into a feedlot ration, to add key micro-nutrients and buffers to the diet.

CONTAINS:

Macro Mineral		Trace Elements	Vitamins
Calcium	21%	Manganese	A,D,E & B1
Magnesium	.5%	Zinc	
Sodium	10%	Copper	Additional Ingredients
Sulphur	2%	Cobalt	Calcareous seaweed
Phosphorous		Iodine	Sodium bicarbonate
		Selenium	Ammonium chloride
		Iron	Molasses
			Bypass energy

DOSE RATE:

Lambs : 20 grams/hd/day

TIMING:

Best supplemented when Lambs are in an intensive feeding program where mixing a supplement into the ration is unachievable.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

DIRECTIONS FOR USE:

Lamb Feedlot Mineral Lick can simply be added to tubs or troughs and placed in pens of intensively fed Lambs. Locate tubs centrally to ensure access by all Lambs in feedlot pens. One container per 50 hd is recommended.

BEST BEFORE:

12 Months from date of Manufacture.

STORAGE:

Store in a cool dry place, out of direct sunlight.

MEDICATED/NON MEDICATED:

Non Medicated.

WITHHOLDING PERIOD:

Nil Withholding.

PACK SIZES:

25KG bag, 40 x 25kg bags per pallet. Bulka bags.
