TRANSFORCE LIQUID

**TRANSITION SUPPLEMENT
FOR SHEEP & CATTLE**

SUMMARY:

Transforce Liquid is a suspension liquid for use as a stress management tool for Sheep or Cattle. Transforce is a high energy supplement with added rumen buffers and glycine and a strong focus on delivering levels of key Minerals, Trace Elements and Vitamins that supports an animals ability to maintain digestion, metabolism, enzyme systems and cellular function through times of stress.

CONTAINS:

Macro Mineral	Micro Minerals	Additional Ingredients
Magnesium	Zinc	Disaccharides
Potassium		Dextrose
Sodium		Glycine
		Sodium bicarbonate
		Essential nutrients
Vitamins		
A, D, E & B1		

DOSE RATE:

Sheep & Goats: Adult 30ml/hd Lambs/Kids 20ml/hd
Cattle : Adult 300ml/hd Calves 200ml/hd
In highly stressed animals a second dose should be considered.

When applying via water, calculate the total daily pen dose and split into 3 equal volumes premixed with a similar amount of water and added to trough and mixed in. Apply one in am, one at midday and in pm. This will maintain even concentration across the day. Water trough should be cleaned regularly through the application period.

TIMING:

Treatment is suggested for the day of and following a stress event. For Pre-Transport treatment, two doses in the two days prior to Transport are recommended.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

**SUSPENSION LIQUID
PRODUCT**

DIRECTIONS FOR USE:

Transforce Liquid is an oral and/or water based supplement in the form of a suspension liquid that doesn't settle out when mixed with water.

Animals can be treated with Transforce directly via a drench gun or pre-mixed in water and applied to water troughs, hay or in hay/grain rations in a mixer wagon.

BEST BEFORE:
