ORAL VITAMIN E
FOR SHEEP

SUMMARY:

Vitamin E Sheep is an oral, low dose supplement focused solely on delivering high levels of Vitamin E.

Vitamin E plays an important role in animal production as an anti-oxidant, in cellular function and immune response and in support of smooth muscle function along with muscle wasting and white muscle disease. Vitamin E is an ideal treatment prior to Weaning, Lambing, Mating and Feedlot entry.

CONTAINS:

Macro Mineral	Trace Elements	Vitamins E
		Additional Ingredients Oil based carrier

DOSE RATE:

Sheep: 5ml/hd
Lambs: 2.5ml/hd

TIMING:

Ideally supplemented prior to key production phases and stress events.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

DIRECTIONS FOR USE:

Vitamin E Sheep is an oral supplement which is easily dosed through a drench gun.

Vitamin E Sheep treatment is best timed 4-6 weeks prior to key production phases and at the time of stress events.
