

# MEGALAC®

## RUMEN PROTECTED FAT

MEGALAC®

### SUMMARY:

Megalac® is a rumen protected fat, providing energy for improved milk yield and fertility. It is made by reacting to fatty acids and calcium to produce a rumen insoluble fat supplement.

Megalac® granules pass through the rumen but are broken down in the acidic small intestine to release the fat and calcium for digestion.

### CONTAINS:

#### Typical analysis

|          |       |
|----------|-------|
| Fat      | 84 %  |
| Ash      | 12.5% |
| Calcium  | 9%    |
| Moisture | 5%    |

### FEEDING RATE

|                |                    |
|----------------|--------------------|
| Lactating Cows | 400 - 800 g/hd/day |
| Dry Cows       | 125 g/hd/day       |
| Beef Cattle    | 150 - 500 g/hd/day |
| Sheep & Goats  | 50 - 100 g/hd/day  |

### Megalac®

Reported conclusion:

- Proven ingredient for increasing milk yield & fertility.
- Improves feed efficiency.
- Increases production of progesterone, the essential hormone for pregnancy, improves quality of eggs and embryo development, all of which contribute to fertility.
- Higher conception and pregnancy rates.
- Increases energy density in rations [ more energy per bite] to supply additional energy despite lower intakes.
- Megalac is not fermented in the rumen and reduces production of methane.

### PACK SIZES: 2kg, 5kg & 25kg bags

This product does not contain restricted animal material.

Store in a cool dry place, nil withholding period.

Manufactured by Volac Wilmar feed Ingredients.

United Kingdom.
