

SUMMARY:

Molodri is a blend of liquid molasses and diatomite [approx. 50% molasses by weight] carefully formulated in a special process which converts the molasses to a dry powder form for convenience.

Molodri is used as a feed attractant and appetite stimulant for cattle, horses, sheep, goats, pigs, and poultry.

CONTAINS:

Approximately:

MOLASSES 50%

DIATOMITE AMORPHOUS SILICA 50%

FEEDING RATE

Add Molodri® as powder to feeds by volume at 2% to 10% depending on individual circumstances.

MOLODRI®

- Maximises feed intake in prepared feeds.
- Economical and cost effective.
- Convenient, no mess.
- Improved palatability with poor quality feeds
- Masks unpalatable feed ingredients
- Increased feed stimulation for fussy eaters
