

MYCOFIX®

PLUS 5.E

Mycofix® Plus 5.E

SUMMARY:

Mycofix® Plus 5.E is an all-in-one mycotoxin risk management solution to protect animals against mycotoxins and endotoxins based on biotransformation, adsorption and bioprotection.

Myco [fungi] toxin [poison] means poisons from fungi, or molds. These can be found in livestock feed and affect health and production.

Endotoxins are a toxin present inside a bacteria cell that is released when it disintegrates.

CONTAINS:

A blend of minerals to bind aflatoxins.

A unique combination of patented specific enzymes and biological components.

The bioprotection mix to prevent the toxic effects caused by all mycotoxins.

FEEDING RATE

0.5 to 2 kg per tonne of feed. Add directly into the feed while mixing.

Recommended for breeding animals.

Mycofix®

- EU authorized and patented product ingredients proven to adsorb aflatoxins and biotransform trichothecenes and fumonisins into nontoxic metabolites.
- Diminishes zearalenone related fertility problems.
- Reduces liver problems and supports the immune system.
- Supports the intestinal barrier to prevent the negative effects of mycotoxins.

PACK SIZES: 2kg, 5kg & 25kg bags

This product does not contain restricted animal material.

Store in a cool dry place, nil withholding period.

Mycofix is a registered trademark of DSM.
