

SUGAR

Sugar

SUMMARY:

Sugar is used in livestock diets for a number of reasons, to sweeten the feed and make it more palatable, increase the energy in the ration, and to increase intake.

DOSE RATE:

General inclusion rates

Cattle

2.5 to 5% of diet, depending on sugar levels in the rest of the diet

SUGAR:

- Used to sweeten feeds, increase palatability.
- Increased dry matter intake.
- supports microbial growth, particularly for fiber-digesting bacteria.
