

# TOXO

## MYCOTOXIN CONTROL

TOXO

### SUMMARY:

Toxo is a light tan free flowing clay-based powder which when added to ruminant's diets assists with mycotoxin control.

TOXO is an integrated approach to protect ruminant animals against toxins produced by moulds and to prevent excretion of their toxic metabolites in milk. A specific blend of ingredients offers multiple protection mechanisms and helps to maintain animal performance. TOXO is especially suitable for ruminant animals, in cool, moderate as well as warmer climates.

### DOSE RATE:

TOXO is especially designed for ruminant animals and may be applied to moulded raw materials and in cases of suspected or confirmed multiple toxin contamination in animal feeds, raw materials, and total mixed rations.

Low risk contamination: 40 grams per head per day

High risk contamination: 80 grams per head per day

Do not exceed 20kg per ton of complete feed.

### TOXO

TOXO contains activated and purified smectite binding agents with optimal binding spectrum and a powerful immunostimulant based on inactive yeast cell wall fractions from a *Saccharomyces cerevisiae* strain.

TOXO may be added to pre-mixes, complete feeds, raw materials as well as total mixed rations (TMR).

TOXO binding agents do not bind vitamins or nutrients.

### PACK SIZES: 2kg, 5kg & 25kg bags

This product does not contain restricted animal material.

Store in a cool dry place, nil withholding period.
