

Trusted, Effective, Affordable

**LIQUID TRANSITION SUPPLEMENT
FOR SHEEP & CATTLE**

SUMMARY:

RumiTranz is an oral liquid formulation for application to Sheep and Cattle at the key transition phases of Weaning and Feedlot Induction. Through these important transition phases, animals often become stressed and agitated which leads to a reduced appetite in the following days, suffer from pinkeye, have poor membrane health, have a reduced immune response along with poor gut health, all potentially contributing to poor performance and respiratory disease.

CONTAINS:

Macro Minerals	Micro Minerals	Additional Ingredients
Magnesium	Zinc	Disaccharides
Potassium		Dextrose
Sodium		Glycine
Vitamins		Sodium bicarbonate
A, D, E & B1		Probiotic
		Prebiotic
		Postbiotic
		Essential nutrients

DOSE RATE:

Weaned Lambs – 30ml/hd orally or 45ml/hd - 15ml/hd/day over 3 days via water.

Feedlot Lambs – 50ml/hd orally or 75ml/hd - 25ml/hd/day or 3 days via water.

Weaned Calves- 200ml/hd orally or 300ml/hd – 100mls/hd/day over 3 days via water.

Feedlot Cattle – 300ml/hd orally or 450ml/hd - 150ml/hd for 3 days via water.

When applying via water, calculate the total daily pen dose and split into 3 equal volumes premixed with a similar amount of water and added to trough and mixed in. Apply one in am, one at midday and in pm. This will maintain even concentration across the day. Water trough should be cleaned regularly through the application period.

TIMING:

For use in Sheep and Cattle at key stress events of Weaning and Feedlot Induction.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL.

**SUSPENSION LIQUID
PRODUCT**

DIRECTIONS FOR USE:

When applying RumiTranz orally, the dose is a large single dose. This large dose is the result of RumiTranz being a combination of 3 formulations, all with a key role at Weaning and Induction, bought together to make a single application. RumiTranz can also be applied via water in small doses over 3 days. Calculate the total daily pen dose and split into 3 equal volumes premixed with a similar amount of water and added to trough and mixed.

BEST BEFORE:

12 Months from date of Manufacture.

STORAGE:

Store in a cool dry place, out of direct sunlight.

MEDICATED/NON MEDICATED:

Non-Medicated

WITHHOLDING PERIOD:

Nil Withholding.

PACK SIZES:

20ltr drum, 1000ltr shuttle

- ✓ **STRESS MANAGEMENT AND RECOVERY**
- ✓ **REDUCE AGITATION AND FLIGHT RESPONSE**
- ✓ **RE-ESTABLISH APPETITE**
- ✓ **RECHARGE IMMUNE RESPONSE**
- ✓ **SUPPORT EYE AND RESPIRATORY HEALTH**
- ✓ **GUT HEALTH AND PATHOGEN CONTROL**
